

PROJECT ANALYTICS REPORT

Part 1-Expense Analysis for the Month of June

Submitted By

- Arbaaj Mansoori

1. INTRODUCTION

Managing personal finances is important for achieving future financial goals. In this project, the monthly expense data of Nitin has been analyzed to identify spending patterns and determine areas where expenses can be reduced to increase savings. Nitin earns ₹15,000 per month and wants to save money to purchase a scooter for daily commuting.

2. OBJECTIVE

The objectives of this analysis are:

- To analyze Nitin's expenses for the month of June.
- To identify the category with the highest expenditure.
- To calculate spending on Entertainment and Shopping.
- To determine how frequently food is ordered online and the total amount spent.
- To identify the number of movie visits.
- To recommend ways to increase savings by reducing unnecessary expenses.

3. DATASET DESCRIPTION

The dataset contains Nitin's expense transactions for the month of June.

The data includes: 35 rows.

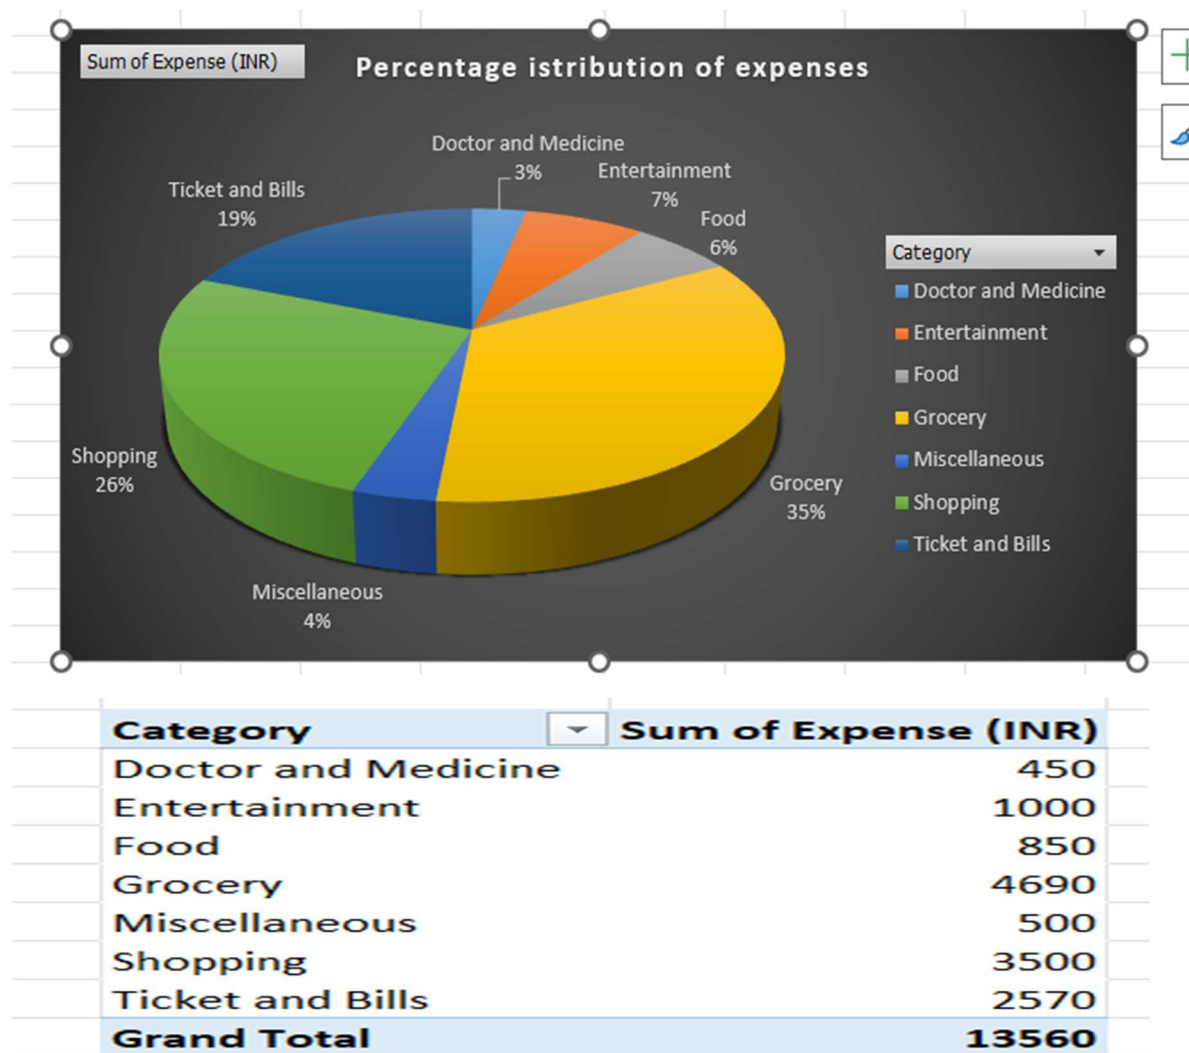

Field	Description
Date	Transaction Date
Category	Expense Category
Item	Expense Item
Expenses	Amount Spent

Categories include:

- Grocery
- Food
- Shopping
- Entertainment
- Bills & Tickets
- Doctor and Medicine
- Miscellaneous

4. ANALYSIS And VISUALIZATIONS

4.1 Category-wise Expense Analysis

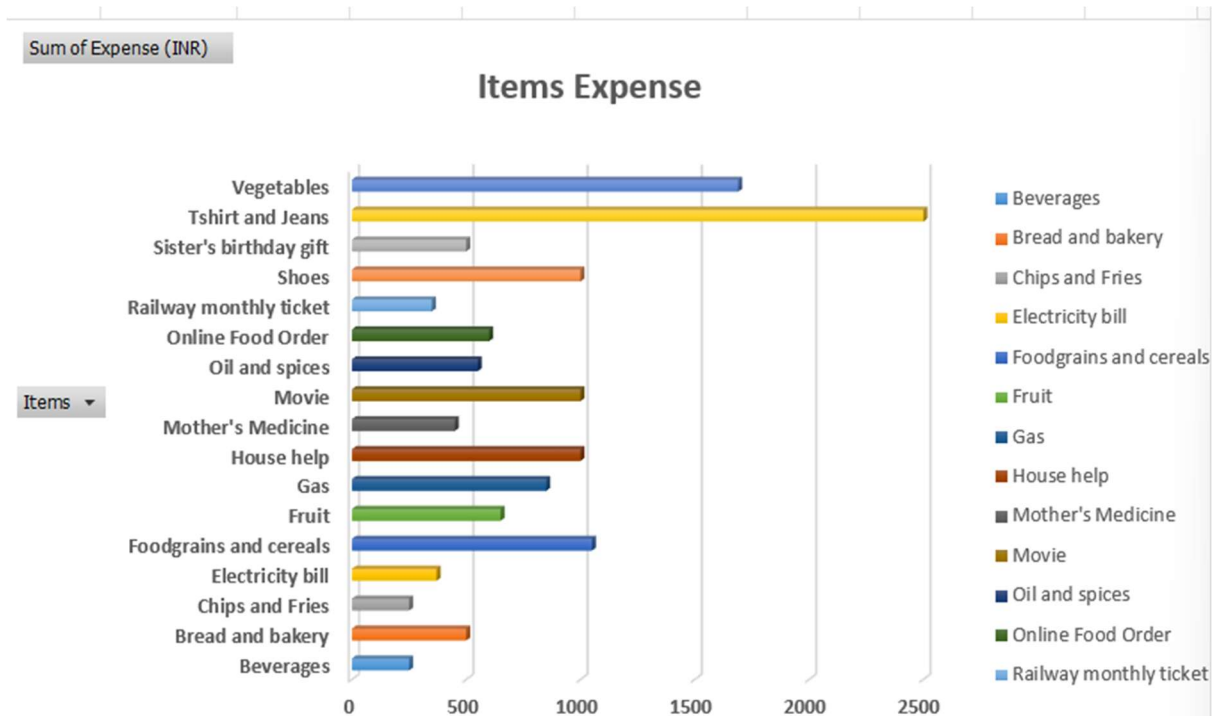

Observation

- Highest spending category: Grocery
- Percentage contribution: 35%

4.2 Item-wise Expense Analysis

Items	Sum of Expense (INR)
Beverages	250
Bread and bakery	500
Chips and Fries	250
Electricity bill	370
Foodgrains and cereals	1050
Fruit	650
Gas	850
House help	1000
Mother's Medicine	450
Movie	1000
Oil and spices	550
Online Food Order	600
Railway monthly ticket	350
Shoes	1000
Sister's birthday gift	500
Tshirt and Jeans	2500
Vegetables	1690
Grand Total	13560

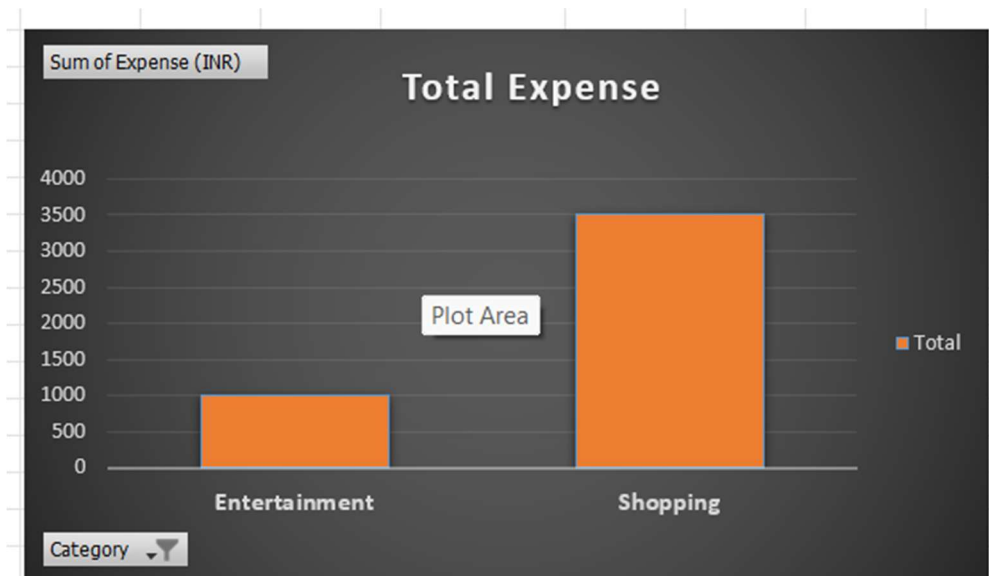

Observation

- Highest expense item: Tshirt and Jeans.
- Lowest expense item: Chips and Fries, Beverages.

4.3 What is the total expense amount for Entertainment and Shopping?

Category	Sum of Expense (INR)
Entertainment	1000
Shopping	3500
Grand Total	4500

Observation

- Total Expense: 4500.

4.4 How many times has Nitin ordered food online?

Count of Items	Column Labels	Sum of Expense (INR)	Column Labels
Row Labels	Online Food Order	Row Labels	Online Food Order
Food	4	Food	600
Grand Total	4	Grand Total	600

Findings:

Metric	Value
Number of online food orders:	4
Amount spent on online food orders:	₹600

Observation

Online food ordering contributes significantly to discretionary expenses.

4.5 How many times has Nitin watched a movie?

Row Labels	Count of Items
Movie	4
Grand Tot	4

Findings

Metric	Value
Number of movies watched	4
Total movie expense	₹1000

Observation

Movie-related expenses are part of entertainment spending and may be reduced if required.

4.6 Frequency of Items Purchased

Category Wise Items	Count of Items
Doctor and Medicine	1
Mother's Medicine	1
Entertainment	4
Movie	4
Food	6
Chips and Fries	2
Online Food Order	4
Grocery	15
Beverages	1
Bread and bakery	3
Foodgrains and cereals	1
Fruit	4
Oil and spices	1
Vegetables	5
Miscellaneous	1
Sister's birthday gift	1
Shopping	2
Shoes	1
Tshirt and Jeans	1
Ticket and Bills	4
Electricity bill	1
Gas	1
House help	1
Railway monthly ticket	1
Grand Total	33

5. KEY FINDINGS

1. The highest expense category is Grocery.
2. Total spending on Entertainment and Shopping is ₹4500.
3. Nitin ordered food online 4 times.
4. Total amount spent on food delivery is ₹600.
5. Nitin watched movies 4 times.
6. The majority of discretionary spending comes from **Shopping** category.

7. RECOMMENDATIONS

Based on the analysis:

Recommendation 1

Reduce spending on entertainment activities such as movies and outings.

Recommendation 2

Limit online food ordering and prefer home-cooked meals.

Recommendation 3

Control impulsive shopping purchases.

Recommendation 4

Create a monthly budget and set a fixed savings target.

Recommendation 5

Track expenses regularly using Excel or budgeting applications.

8. Conclusion

The analysis of June expenses indicates that a significant portion of Nitin's income is spent on non-essential categories such as Entertainment, Shopping, and Online Food Orders. By reducing these discretionary expenses and following a structured budget, Nitin can increase his monthly savings and achieve his goal of purchasing a scooter in a shorter period.

Part 2-Expense Analysis for the Last 6 Months

1. INTRODUCTION

Financial planning plays an important role in achieving personal goals. Nitin, a Graphic Designer earning ₹15,000 per month, wishes to purchase a scooter for his daily commute. However, he has been unable to save consistently. This project analyzes Nitin's expenses over the last six months to identify spending patterns, major expense categories, and opportunities for increasing savings.

2. OBJECTIVES

The objectives of this analysis are:

- To study Nitin's expense trends over the last six months.
- To identify the month with the highest expenditure.
- To analyze category-wise spending.
- To determine the top two expense categories for each month.
- To analyze spending on Entertainment, Food, and Shopping.
- To recommend practical measures to improve savings.

3. DATASET DESCRIPTION

The dataset contains six months of expense records with 103 rows and 4 columns including:

- Month
- Category
- Item
- Expense

Categories include:

- Grocery
- Food
- Entertainment
- Shopping
- Doctor and Medicine
- Bills & Tickets
- Miscellaneous

4. ANALYSIS AND VISUALIZATIONS

4.1 Month-wise Expense Trend

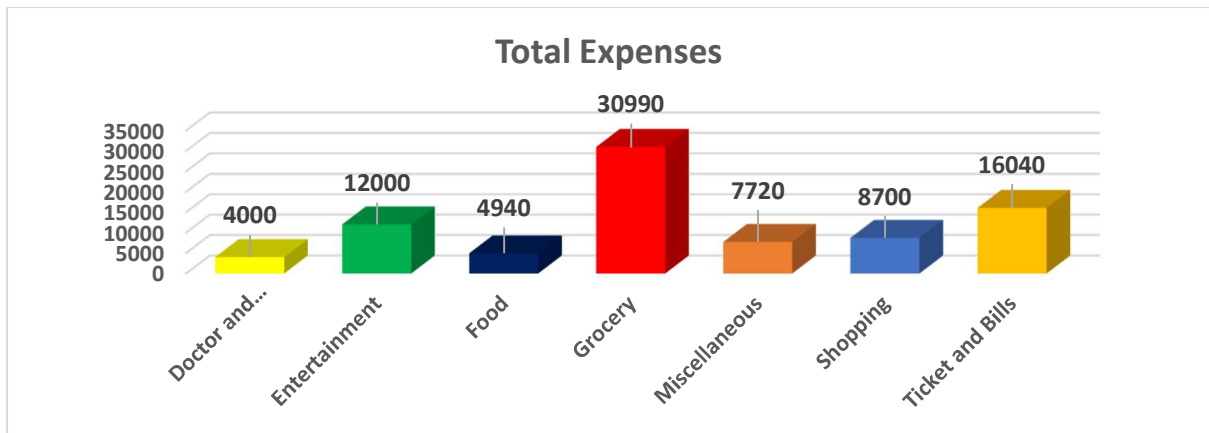

Months	Sum of E
January	₹ 13,900
February	₹ 15,620
March	₹ 13,140
April	₹ 14,800
May	₹ 13,370
June	₹ 13,560
Grand Total	₹ 84,390

Observation

- The highest spending month was **February**.
- The lowest spending month was **March**.
- Expenses showed an unstable trend over the six-month period.

5.2 Category-wise Expense Analysis

Row Labels	Sum of Exper
Doctor and Medicine	4000
Entertainment	12000
Food	4940
Grocery	30990
Miscellaneous	7720
Shopping	8700
Ticket and Bills	16040
Grand Total	84390

Observation

- The highest expense category is **Grocery**.
- The lowest expense category is **Doctor and Medicines**.
- Most of Nitin's income is spent on **Grocery**.

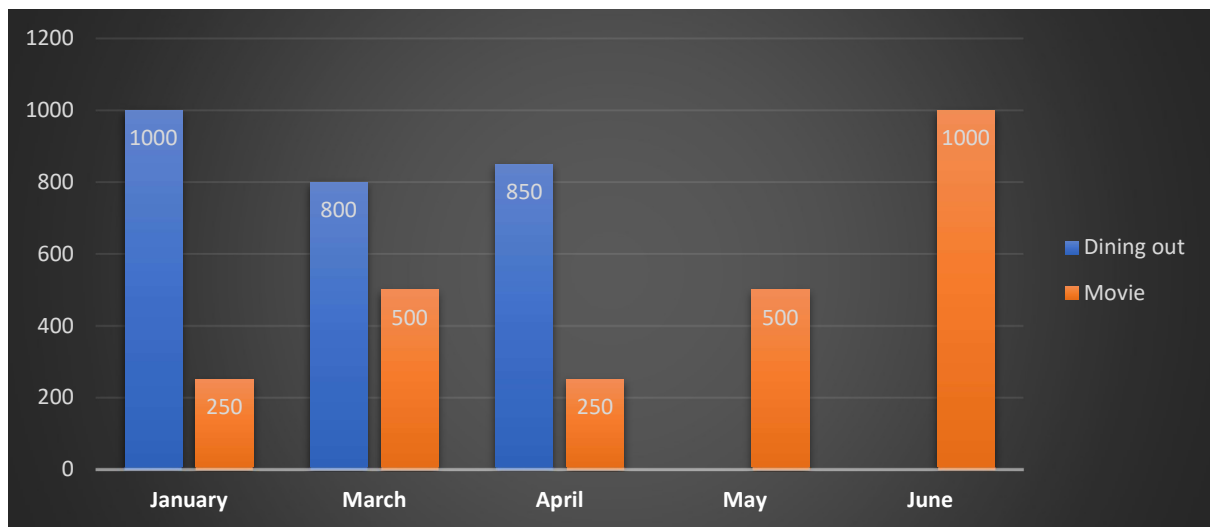

4.3 Top Two Expense Categories for Each Month

Months	1st Highest	2nd Highest
January	Grocery	Ticket and Bills
February	Entertainment	Grocery
March	Grocery	Ticket and Bills
April	Grocery	Miscellaneous
May	Grocery	Ticket and Bills
June	Grocery	Shopping

Observation

The categories **Grocery** and **Ticket and Bills** consistently appear among the highest spending categories.

4.4 Month-wise Movie & Dining Out Expenses

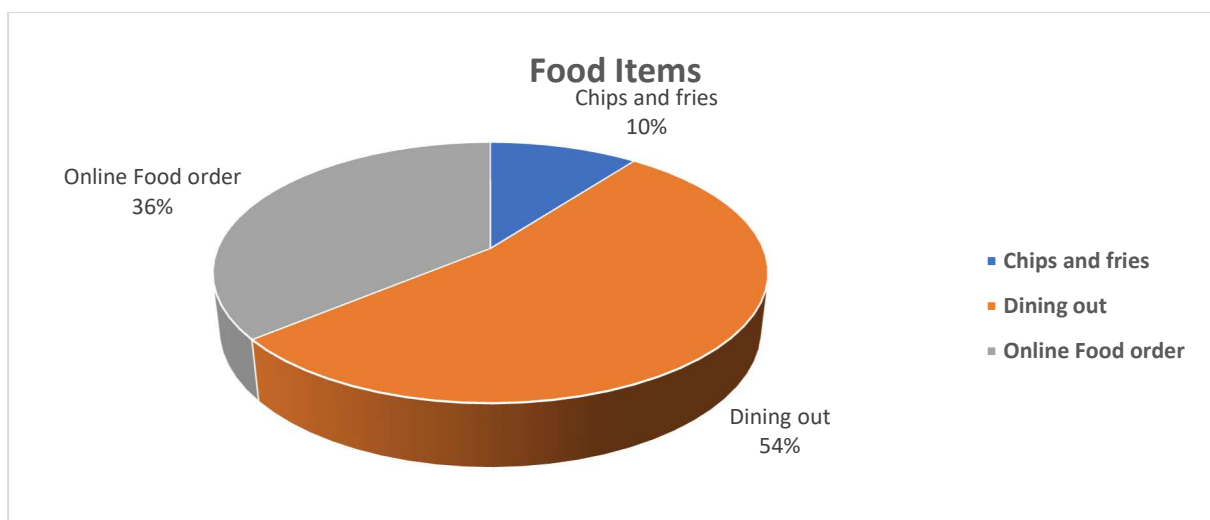

Observation

Nitin have spends more on Movies than Dining out.

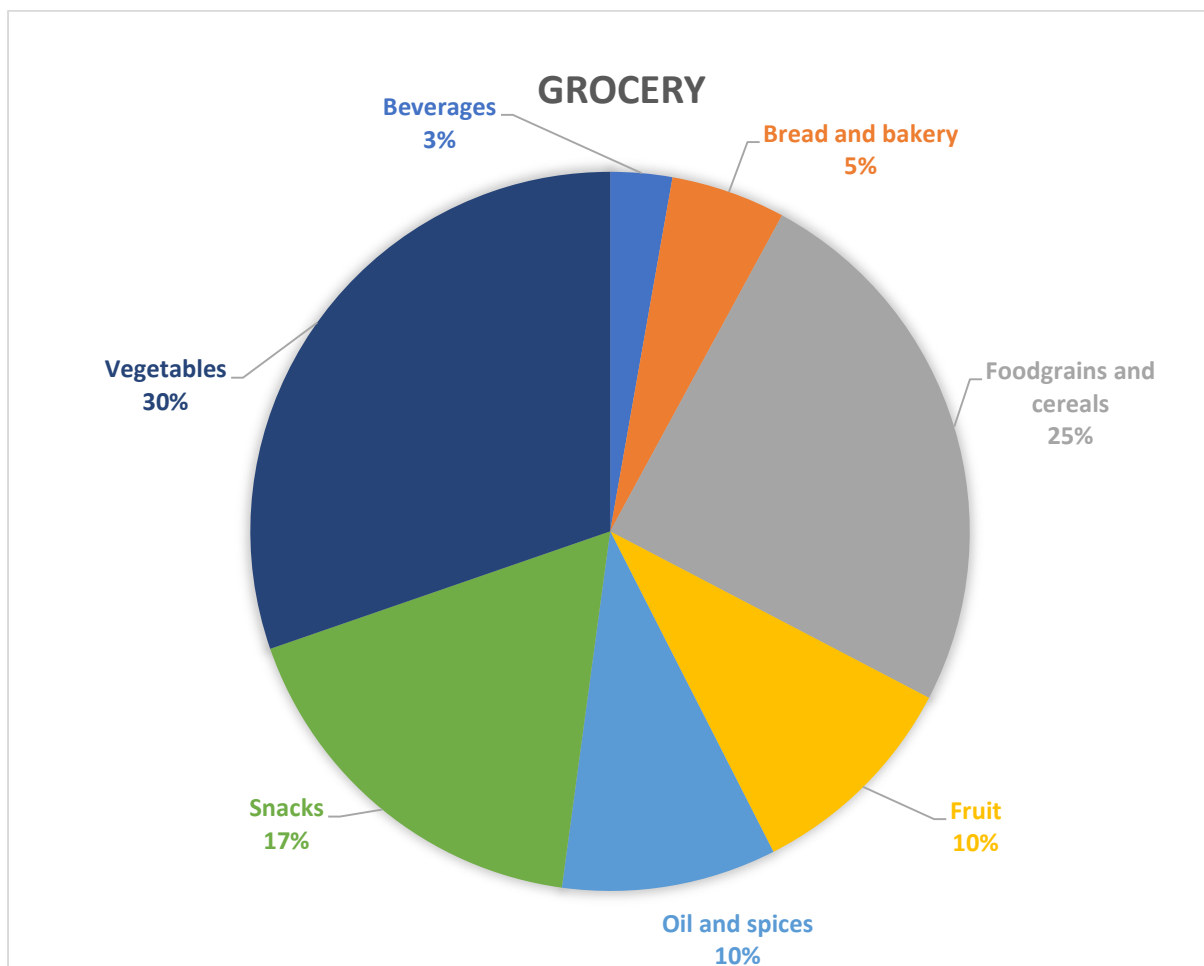

4.5 How much money has Nitin spent on different Food items?

Row Labels	Food	Grand Total
Chips and fries	510	510
Dining out	2650	2650
Online Food order	1780	1780
Grand Total	4940	4940

4.5 How much money has Nitin spent on different Grocery items?

Items	Grocery
Beverages	860
Bread and bakery	1600
Foodgrains and cere	7660
Fruit	3050
Oil and spices	2990
Snacks	5440
Vegetables	9390
Grand Total	30990

4.5 Category wise Frequency of items?

Row Labels	Count of Items		
Doctor and Medicine	7	Miscellaneous	7
Mother's doctor visit	1	Brother's tuition fee	1
Mother's medicine	6	Miscellaneous	5
Entertainment	8	Sister's birthday gift	1
Movie	5	Shopping	5
North Bengal Trip	1	Shirts	2
Outing with friends	2	Shoes	2
Food	8	Tshirt and Jeans	1
Chips and fries	2	Ticket and Bills	24
Dining out	3	Electricity bill	6
Online Food order	3	Gas	6
Grocery	42	House help	6
Beverages	4	Railway Monthly Ticket	6
Bread and bakery	6	Grand Total	101
Foodgrains and cereals	6		
Fruit	6		
Oil and spices	5		
Snacks	9		
Vegetables	6		

4.6 Essential vs Non-Essential Expenses

Essential Categories

- Grocery
- Bills & Tickets
- Doctors and Medicines

Non-Essential Categories and Items

- Entertainment
- Dining Out
- Shopping
- Chips and fries

Observation

A significant portion of Nitin's monthly expenses comes from discretionary spending categories that can be reduced without affecting daily necessities.

6. KEY FINDINGS

1. The highest overall spending month was **February**.
2. The category with the highest cumulative expense was **Grocery**.
3. Entertainment, Food, and Shopping contribute a major share of discretionary expenses.

4. Movies and Dining Out account for a considerable portion of monthly spending.
5. Shopping expenses fluctuate significantly across months.
6. Reducing non-essential spending can substantially improve savings.

7. RECOMMENDATIONS

Recommendation 1: Reduce Dining Out Expenses

Preparing meals at home can significantly reduce monthly expenses.

Recommendation 2: Limit Movie and Entertainment Spending

Setting a monthly entertainment budget will help control discretionary expenses.

Recommendation 3: Avoid Impulse Shopping

Purchases should be planned and limited to necessary items.

Recommendation 4: Set Monthly Savings Goals

Nitin should save a fixed percentage of his salary every month before spending.

Recommendation 5: Track Expenses Regularly

Using Excel dashboards or budgeting applications can improve financial discipline.

8. CONCLUSION

The six-month expense analysis reveals that a large portion of Nitin's income is spent on discretionary categories such as Entertainment, Dining Out, and Shopping. By controlling these expenses and following a structured budget plan, Nitin can increase his monthly savings and achieve his goal of purchasing a scooter more quickly. The analysis highlights the importance of monitoring expenses and prioritizing essential spending for better financial management.
